RESOLUTION NO. 05, Series of 2021

A RESOLUTION SETTING THE INSTALLED GENERATING CAPACITY AND MARKET SHARE LIMITATION PER GRID AND NATIONAL GRID FOR 2021

WHEREAS, pursuant to Section 45 (a) of Republic Act No. 9136, otherwise known as the Electric Power Industry Reform Act (EPIRA) and Section 4 (a), Rule 11 of its Implementing Rules and Regulations (IRR), the Energy Regulatory Commission (ERC) formulated and adopted the "Guidelines for the Determination of Installed Generating Capacity in a Grid and the National Installed Generating Capacity and Enforcement of the Limits of Concentration of Ownership, Operation or Control of Installed Generating Capacity" (MSL Guidelines) in its Resolution No. 26, Series of 2005;

WHEREAS, the subject MSL Guidelines took effect on 22 February 2006;

WHEREAS, under Section 3, Article II of the said MSL Guidelines, the ERC set the 2020 installed generating capacity and the Market Share Limitation per Grid and National Grid per Resolution No. 2, Series of 2020 dated 12 March 2020, as follows:

Grid	Installed Generating Capacity (kW)	% Market Share Limitation as per RA 9136	Installed Generating Capacity Limit (kW)
Luzon	16,044,000	30%	4,813,200.00
Visayas	3,366,558	30%	1,009,967.40
Mindanao	3,999,096	30%	1,199,728.80
National	23,409,654	25%	5,852,413.50

WHEREAS, the foregoing installed generating capacity per Grid and National Grid and Market Share Limitation (MSL) determination shall be adjusted by the ERC on or before the 15th day of March of the succeeding years and/or as often as may be necessary;

WHEREAS, pursuant to Resolution No. 5, Series of 2019, the ERC adopted the use of Pmax as a standard basis for identifying the maximum capacity for generation facilities for the calculation of the Installed Generating Capacity (IGC);

WHEREAS, the 2014 Revised Rules for the Issuance of COCs for Generation Companies, Qualified End-Users and Entities with Self-Generation Facilities, adopted under ERC Resolution No. 16, Series of 2014, defined Pmax as the "maximum demand in MW that a generating unit, or generating block or module, in case of a combined cycle power plant, can reliably sustain for an indefinite period of time, based on the generator capability tests";

NOW, THEREFORE, pursuant to its mandate to promote free and fair competition in the generation and supply of electricity to achieve greater operational and economic efficiency, and to ensure consumer protection and enhance the competitive operation of the markets for generation and supply of electricity, the ERC **RESOLVED,** as it hereby **RESOLVES** to set the 2021 IGC per Grid and National Grid, and the MSL per Grid and National Grid, using Pmax as the maximum capacity adopted for generation facilities, as follows:

Grid	Installed Generating Capacity (kW)	% Market Share Limitation as per RA 9136	Installed Generating Capacity Limit (kW)
Luzon	15,974,881.86	30%	4,792,464.56
Visayas	3,381,608.00	30%	1,014,482.40
Mindanao	4,065,849.00	30%	1,219,754.70
National	**23,422,338.86**	**25%**	**5,855,584.72**

The same shall remain and shall be strictly enforced and implemented until the next adjustment thereto which may be on or before the 15th day of March of 2022 and every year thereafter and/or as the need arises.

This Resolution and its Appendix "A," hereto attached and made as an integral part of this Resolution, shall take effect immediately following their publication in a newspaper of general circulation in the Philippines.

(This space is intentionally left blank)

Let copies of this Resolution be furnished to the University of the Philippines Law Center-Office of the National Administrative Register (UPLC-ONAR) and all industry stakeholders, as well as published in the ERC website and such other online platform available to the Commission under the current circumstances.

SO ORDERED.
